Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nonomura et al (US 4487480).

Nonomura discloses a liquid crystal display (LCD) module comprising a transparent front panel 23, a rear panel (22/21) and a liquid crystal (LC) layer (34/33) sandwiched between the transparent front panel and the rear panel, the transparent front panel having a central area opposing areas of said LC layer and the rear panel and a peripheral area extending from the central area, the transparent front panel inherently acting as an overcoat for protecting the LC layer and the rear panel against a reasonable external force.

It is noted that both (Nonomura and the present invention) disclose similar structural for the front and rear panels, i.e., the front panel is longer than the rear panel.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kipfer et al (US 6005654).

Kipfer discloses a liquid crystal display (LCD) module comprising a transparent front panel 22, a rear panel 24 and a liquid crystal (LC) layer CL sandwiched between the transparent front panel and the rear panel, the transparent front panel having a central area opposing areas of

said LC layer and the rear panel and a peripheral area extending from the central area, the transparent front panel inherently acting as an overcoat for protecting the LC layer and the rear panel against a reasonable external force.

It is noted that both (Kipfer and the present invention) disclose similar structural for the front and rear panels, i.e., the front panel is longer than the rear panel.

Allowable Subject Matter

4. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a liquid crystal display device comprising *a combination of various elements* as claimed, more specifically, particular detailed limitations as recited in claims 2-5.
